

PROTECT YOUR PATIENTS IN THE “NEW NORMAL”

Influenza is Making a Come Back¹

Flu can wreak havoc on major organs, including the heart, brain and lungs²⁻⁵

Vaccinating against influenza can help:

Annual flu shot continues to be more important than ever!⁶

Vaxigrip Tetra[®]
Quadrivalent influenza vaccine (split virion, inactivated)

is indicated for active immunization of adults, including pregnant women, and children from 6 months of age, and passive protection for newborns less than 6 months of age born to women vaccinated during pregnancy.*⁷

*Not all infants may be protected
