

EVENTITY[®] is the first and only bone builder that works differently with a dual effect¹⁻¹²

EVENTITY[®] works with the body's natural ability to increase bone formation and, to a lesser extent, decrease bone resorption^{13,14}

EVENTITY[®] INCREASES OSTEOBLASTIC ACTIVITY¹⁴

as demonstrated by increases in sP1NP (bone formation marker)

EVENTITY[®] DECREASES OSTEOCLASTIC ACTIVITY¹⁴

as demonstrated by decreases in sCTX (bone resorption marker)

Mechanism of action representations are for illustrative purposes only and are not meant to imply clinical efficacy.

EVENTITY[®] is a humanized monoclonal antibody that binds and inhibits sclerostin, a regulatory factor in bone metabolism.¹³
